To Whom It May Concern: South Carolina & Gas Company has took our rates up since January 2010 my light bill was no higher then \$180.00 dollars at one time it would go up 20 or 30 dollars more at times but never as high as it is now. It's over \$300 dollars every month since January 2010. They are asking for a increase in rates how can we afford that, we can Harley pay our bill now. Its a lot of people out here living in the dark because they can't keep there lights on if any thing they should be taking them down some, look at the way the economy is now there are lots of people out here with no jobs how can we afford to pay a higher light bills when we can't even pay our rent. Most of us are living check the check are on welfare are employment benefits please don't increase our bill we can't afford to pay it but we need lights so do our children. Please help me I have three kids and a wife its hard for us now to keep up with our bills we can't afford to pay a higher light bill and my family needs lights please help us and other family's like us out there in the world everywhere.

Thank You.
